CREATIONS WITH INIMITABLE "SIGNATURES"

English master watchmaker based in the picturesque town of Rolle on the shores of Lac Léman takes his inspiration from watchmaking history to bring us original and exceptional timepieces.

Having earned the respect of connoisseurs and collectors, Peter Speake-Marin has become a force to be reckoned with in the world of fine horology. There is a sense of awe when handling and admiring the detail and craftsmanship that make up these watches; it is something that remains with you long after you have handled the watch. The original design and attention to detail give these timepieces a feeling of quality and fine workmanship reminiscent of bygone days. Such an intensely personalised approach to the craft of watchmaking has become a rarity in this modern age. However, from the simplicity and beauty of an enamel dial to the intricate nature of a hand-engraved or hand-frosted dial, one can see that each Speake-Marin watch is a tribute to the art of watchmaking.

◀ **Piccadilly** in steel with automatic mechanical movement, 18ct gold silvered dial, frosted finish by hand, blue steel hands, 18ct gold/steel crown and tube, sapphire glass front and back (dimensions of case: diameter 38mm, thickness 13.5mm)
